“A New Beginning-----”

It gives me an immense pleasure to present you the first issue of S.S.V.P.S.B.S.DEORE Polytechnic newsletter ‘SPARK’.

This is a new beginning for all of the us. New, always brings us a change .New is a kind of break for a creative initiative . For us ‘SPARK’ is on outcome of our commitment towards each activity that we undertake in our institute. It is a new platform to showcase our activities.

We at S.S.V.P.S.B.S.DEORE Polytechnic encourage and empower our faculties to improve and give their best. Every month we have different activities that have been performed by students. Students enthusiastically come forward to organize many functions like Technofest, Engineer’s day, Teacher’s day, Ganapati Festival etc. Not every activity always enjoys a great success but it is a successful effort by students towards a journey of excellence .It is a process of learning for each of the student through the activities that they perform.

We have decided to initiate the newsletter activity to encourage and appreciate efforts of students and to showcase them to the people from academics and industry. There are glimpses of what we do to make our students better to understand & prepare to face future challenges. So here journey has begun towards something which is new. Soon it will turn out to be excellent activity and it will continue. You all are welcome to join it.

Well begun is half done!.

It has been fantastic to welcome the new batch of students at college. The future belongs to you, therefore you need to participate and prepare yourself for on active participation in the world. What comes to your mind when you think of your aims and dreams. After chasing enough of competition you enter into the world of diploma and here your journey begins. To have great start is always a wonderful thing but to end it successfully is more important. You need to fulfill your dreams by allowing yourself to do hard work followed by persistence. Today we live in the world of Technology. Thousands of academic books & papers are available on the internet . Books can help you to built up the career you want and excel your knowledge of the field you have chosen as a career .Your aim should not be limited to an engineering only. It should have some more horizons of knowledge. Being a successful student means you are brilliant not just on the paper of your report card but also being able to recreate your knowledge practically. The theories that you learn in the classroom are always applicable to the outside world .You need to develop that vision inside you. As you grow up academically , your social awareness should also be groomed.

Your knowledge can be used for betterment of society. As a social entity you must be inclined towards social responsibilities. From now on you are no more high school students to follow the limited concepts. Being in an engineering/diploma institute is also about act of self awareness, personality grooming and self studies. You are in an adolescent age, an age where your mind, brain and life can be trained towards fruitful results. No castle can be built an overnight. It requires long years of studies ,experience and assistance from the mentors.

To be fully aware of what you want in your life is more important and then paths will lead you to success . Don't think about failures & hardships that might come into the path of your achievements. Just keep working and one day you will see yourself at the place where you always wanted to reach. Bring your best skills that will help you to meet the needs of your profession. Skill development is one of the major things that should be desired by the students of modern era.

Believe in virtues and follow your heart. Be a good student proud son or daughter and responsible citizen. So here wishing you a lot of luck and blessing for your academic journey.

STORY : Elephant and The Rope

As my friend was passing the elephants, he suddenly stopped, confused by the fact that these huge creatures were being held by only a small rope tied to their front leg. No chains, no cages. It was obvious that the elephants could, at anytime, break away from the ropes they were tied to but for some reason, they did not. My friend saw a trainer nearby and asked why these beautiful, magnificent animals just stood there and made no attempt to get away.

“Well,” he said, “when they

are very young and much smaller we use the same size of rope to tie them and, at that age, it's enough to hold them. As they grow up, they are conditioned to believe they cannot break away. They believe the rope can still hold them, so they never try to break free.” My friend was amazed. These animals could at any time break free from their bonds but because they believed they couldn't, they were stuck right where they were.

Like the elephants, how many of us go through life hanging onto a belief that we cannot do something, simply because we failed at it once before?

Failure is part of learning ; we should never give up the struggle in life.

*“Why are you so
enchanted by this
world ,when a mine
of gold lies within
you!” -Rumi*

POEM : The Road Not Taken

By Robert Frost

Two roads diverged in a yellow wood,
And sorry I could not travel both
And be one traveler, long I stood
And looked down one as far as I could
To where it bent in the undergrowth;

Then took the other, as just as fair,
And having perhaps the better claim,
Because it was grassy and wanted wear;
Though as for that the passing there
Had worn them really about the same,

And both that morning equally lay
In leaves no step had trodden black.
Oh, I kept the first for another day!
Yet knowing how way leads on to way,
I doubted if I should ever come back.

I shall be telling this with a sigh
Somewhere ages and ages hence:
Two roads diverged in a wood, and I—
I took the one less traveled by,
And that has made all the difference .
